Angel P. Peradilla

Address: Brgy. 14, Pastor St., Poblacion, Batangas City, Batangas
Contact No:, 09125744702
Personal Email: angelperadilla9@gmail.com

PROFESSIONAL SUMMARY

BS Information Technology graduate with a specialization in Business Analytics. Experienced in developing web-based applications, analyzing business requirements, and working with databases through academic projects and internship experience. Skilled in problem-solving, teamwork, and translating business needs into technology solutions. Eager to contribute technical and analytical skills while continuously learning and growing in the IT industry.

EDUCATION

Batangas State University, Alangilan Campus, Batangas City 2022 – 2026

- Bachelor of Science in Information Technology Major in Business Analytics

PROFESSIONAL EXPERIENCE

Freelance System Developer / Project Manager | May 2026 – July 2026

- Communicated directly with clients to understand system requirements, business processes, and requested functionalities.
- Gathered and clarified client requirements and translated business needs into proposed system features and functionalities.
- Discussed system revisions, enhancements, and changes with clients based on their feedback and requirements.
- Coordinated with the development process to ensure implemented functionalities aligned with agreed requirements.
- Created and maintained system, project, and technical documentation to support development.
- Used Jira for task tracking, issue management, and sprint coordination within an Agile/Scrum workflow.
- Assisted in reviewing and validating system functionalities based on client requirements.

On The Job Training | Batangas State University – The National Engineering University (Pablo Borbon Campus) (Project Manager & Scrum Master) | February 2026 – May 2026

- Led the planning, task allocation, sprint coordination, and progress monitoring for four software projects: *Student Mobile Application, Employee Mobile Application, Budget System, and Auxiliary System*, helping ensure milestones were completed on schedule.
- Facilitated communication between developers and supervisors to align project requirements, development progress, and deliverables.
- Assisted in frontend development, UI/UX design, quality assurance, testing, debugging, and code refactoring, contributing to improved usability, system stability, and maintainability.
- Performed API testing using Postman to validate endpoints, request and response behavior, and data handling.
- Participated in API integration, User Acceptance Testing (UAT), and system testing, helping identify and resolve issues before deployment.
- Created and executed test cases to validate system functionality, contributing to more reliable and higher-quality software releases.
- Documented identified issues and collaborated with developers to support defect resolution and system improvements.

TECHNICAL SKILLS

- **Quality Assurance & Testing:** Manual Testing, Functional Testing, API Testing, User Acceptance Testing (UAT), Regression Testing, Test Case Creation, Bug Reporting, Selenium, Postman, Lighthouse, BrowserStack.
- **Business Analysis:** Requirements Gathering, Client Communication, System Analysis, Requirements Documentation, Process Documentation, Technical Documentation, Test Documentation, Agile/Scrum
- **Project Management & Collaboration:** Jira, Scrum, Git, GitHub, Sprint Planning, Task Tracking, Issue Tracking, Project Coordination, Team Collaboration
- **API & Web Technologies:** Swagger/OpenAPI, React.js, Node.js, Express.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS
- **Programming & Database:** Python, Java, PostgreSQL, SQL
- **Tools:** Visual Studio Code, pgAdmin, Power BI, Figma, Canva, Microsoft Word, Excel, PowerPoint, Lucidchart

---

ACADEMIC PROJECTS

- **Capstone Project: Web-Based Centralized Inventory Management System with Decision Support System for L-Jean Construction & Supply (Private System) (Team Lead)**
  - Communicated directly with clients to understand system requirements, business processes, and requested functionalities.
  - Led the development of a centralized inventory management system for multiple branches, enabling real-time inventory monitoring, stock transfers, and delivery tracking.
  - Developed demand forecasting and automated restocking features using predictive analytics, improving inventory planning and decision-making through interactive dashboards.

- **ITCARE: Disaster Management System (Team Lead | Python)**
  - Led the development of a disaster management system that streamlined incident reporting, emergency response coordination, and resource monitoring.
  - Designed and implemented core system modules, coordinated development tasks, and ensured efficient collaboration throughout the project lifecycle.

- **PrestigeWheels: Car Dealership System (Java | NetBeans)**
  - Developed a desktop-based dealership management system for handling vehicle inventory, customer records, and sales transactions.
  - Implemented modules for vehicle management, transaction processing, and report generation using Java and object-oriented programming principles.

- **Ko.Py Billing System (Team Lead | Python)**
  - Led the development of a billing and invoicing system that automated customer billing, payment recording, and sales tracking.
  - Designed core billing functionalities, managed team development, and ensured accurate transaction processing and reporting.

ORGANIZATION & CERTIFICATES

- Certificate of Completion Data Analytics Essentials through the Cisco Networking Academy program.
- 1st Place – UI/UX Redesign Competition, TECHNOFUSION 2025
- Dean's Lister, Batangas State University
- Junior Philippine Computer Society (JPCS) National – Member
- Design Thinking Workshop, TECHNOFUSION 2024
- PIVOT 2025: Shaping Skills, Research, and Careers in the Age of AI
- ICONS Startup Roadshow
- Batangas Information Technology Conference 2024
